Internship & Training

AICTE - Edunet Foundation | IBM SkillsBuild | Virtual Internship

Sep 2025 - Oct 2025

- Built and deployed 3+ machine learning applications integrating AI and cloud-based workflows.
- Processed and visualized datasets containing 10,000+ records using Pandas, NumPy, and Matplotlib.
- Collaborated in a virtual team environment to deliver AI-driven prototypes within strict project deadlines.

Competitive Programming | Lovely Professional University | Summer Training

Jun 2025 - Jul 2025

- Solved 500+ algorithmic problems across LeetCode and Codeforces covering graphs, Dynamic Programming, greedy, and advanced data structures.
- Improved competitive programming ranking by 65% through consistent optimization of time and space complexity.
- Reduced average solution runtime by 30-40% using STL optimization and advanced algorithmic techniques.

Projects

RAONE - Enterprise AI Copilot with Hybrid RAG & LLM Orchestration

Mar 2026 - Apr 2026

- Engineered a multi-tenant SaaS AI copilot supporting secure chatbot interactions over private knowledge bases using Hybrid RAG architecture.
- Integrated Dense + Sparse retrieval pipelines with FAISS and BM25, improving contextual response relevance and retrieval efficiency.
- Implemented LLM orchestration with Groq, OpenRouter, HuggingFace, and Ollama fallback systems ensuring high availability.
- Developed scalable FastAPI backend APIs and React dashboard supporting API-key based third-party chatbot integrations.

VisionTraffic - Smart Vehicle Traffic Monitoring System

Apr 2025 - May 2025

- Developed a real-time AI-powered traffic monitoring system capable of vehicle detection, classification, speed estimation, anomaly detection, and OCR-based license plate recognition.
- Trained and optimized YOLOv8 models on 900+ annotated traffic instances across 7 vehicle classes.

Education

Lovely Professional University | Bachelor of Technology - Computer Science and Engineering

Since August 2023 | CGPA: 9.12

Skills

C++, Python, C, Java, JavaScript, React, HTML, CSS, FastAPI, Linux, Docker, AWS, Jenkins, Hadoop, Matplotlib, NumPy, Pandas, Seaborn, Scikit-learn, LLMs, RAG, FAISS, BM25
